## WORK EXPERIENCE

22/10/2022 – current – Tashkent, Uzbekistan

**IT specialist**

Nordic International University

## EDUCATION AND TRAINING

02/09/2021 – 19/07/2026 – Tashkent city, Uzbekistan

**Bachelor degree (Economics)**

Tashkent State Transport University

Economic sectors and industries refer to the different areas of economic activity that contribute to the production, distribution, and consumption of goods and services in an economy. These sectors are generally divided into primary, secondary, and tertiary sectors.

- **Primary Sector:** This includes industries that extract and harvest natural resources directly from the Earth. Examples include agriculture, fishing, mining, and forestry. The primary sector is essential because it provides raw materials that are further processed by other sectors.
- **Secondary Sector:** This sector involves the transformation of raw materials into finished goods and products. It includes industries such as manufacturing, construction, and energy production. The secondary sector adds value to raw materials by turning them into products that can be sold to consumers or used in further production processes.
- **Tertiary Sector:** Also known as the service sector, this involves the provision of services rather than goods. It includes industries such as retail, healthcare, education, finance, tourism, and entertainment. The tertiary sector is increasingly significant in modern economies, especially in developed nations.
- **Quaternary Sector:** This is a more recent categorization that includes knowledge-based industries. These industries are involved in research, information technology, consulting, education, and other intellectual services. It represents an advanced stage of economic development, often driven by innovation and technology.
- **Quinary Sector:** The quinary sector includes high-level decision-making and knowledge-based activities such as government services, nonprofit organizations, scientific research, and higher education. It is associated with individuals who have advanced knowledge and skills in specialized fields.

## LANGUAGE SKILLS

**MOTHER TONGUE(S):** Uzbek
