Dear students and future Nordicians!

Today is the moment to take a bold step towards your dreams and goals, a stage where you build your tomorrow with knowledge, experience, and confidence! Nordic University invites you on such a journey of learning!

Nordic means:

- modern and internationally recognized educational programs
- opportunities for double-degree diplomas
- 100% grants and scholarships
- studying with Uzbekistan's leading professors and foreign specialists
- wide opportunities for academic and personal development, research, and innovations

At our university, professional growth, national values, and a modern educational environment adapted to different cultures are a priority. Through study, you will not only acquire knowledge and enlightenment but also become specialists who bring new ideas to their fields and turn into leading professionals in society.

Education at Nordic, through meetings with global leaders and motivational sessions, will give you the chance to look toward a brighter future!

Dear youth!
The university aims to provide you with knowledge that is both relevant today and prepares you to solve future problems. Together with your perseverance and experience, this will give you not only professional advantage but also the ability to secure your place in the competitive job market.

Remember, the future is created by you! At Nordic, through knowledge and experience, you will shape your path, develop a global mindset, and become a strong pillar of society for the future.

Sherzod Mustafakulov

Doctor of Economics, Professor,
Rector of Nordic International University

Why Nordic?

“Nordic” refers to the Northern European countries and their culture. This concept represents a high quality of life, social equality, and a sustainable development model, exemplified by Scandinavian nations – Norway, Sweden, Denmark, Finland, and Iceland. Nordic International University proudly carries this name!

University History:
On May 27, 2022, during the 10th meeting of Uzbekistan–Finland foreign ministers on political consultations in Tashkent, an agreement was reached to establish a modern private higher education institution – Nordic International University – based on the advanced educational achievements of Northern Europe.

On August 8, 2022, the university began operations under license N°034528 from the State Inspectorate for Quality Control in Education under the Cabinet of Ministers.

The university specializes in providing knowledge in modern finance, economics, data science, industry, IT, journalism, and education, developing analytical thinking and practical skills.

All Nordic International University resources – professors, libraries, classrooms, and research centers – are designed for student success. Here you will gain not only theoretical knowledge but also practical skills, fresh ideas, and valuable experience!

Discover our exchange opportunities!

Strategic Directions:

1. Education by global standards

Lessons are based on advanced education systems of Finland, the USA, and Korea. The curriculum integrates CLIL (Content and Language Integrated Learning), STEAM approaches, and innovative technologies

2. Partnership and academic exchange

Partnerships have been established with leading universities in Europe and Asia. Students and teachers have opportunities to gain international experience through programs such as Work & Travel, Double Degree, and Erasmus+

3. Development through innovation and research

Scientific projects, startups, and grants are offered for students and teachers. Steady progress is being made in fields such as digital education, artificial intelligence, and social innovations

4. Encouraging social activity and leadership

Through student self-governance clubs, volunteer activities, events, and competitions, students develop leadership, teamwork, and communication skills

5. Student-centered education

Each student benefits from an individual approach, mentorship, and a psychological support system

Nordic unites talented students from 14 regions of Uzbekistan and neighboring countries at its three campuses in the capital.
