Summary

Software Engineer with nearly 3 years of experience in developing backend API services using Node.js. Skilled in designing and implementing scalable backend solutions, with additional capability to contribute to frontend tasks when required. Adaptable and resourceful, able to work effectively both independently and within collaborative team environments.

Experience

ChatFolders - *chatfolders.com*

Oct 2024 – Present

Founder and Developer of ChatFolders

Tashkent, Uzbekistan

- Developed "ChatFolders" a browser extension designed to enhance productivity for **ChatGPT** users by enabling folder and bookmark organization with cross-device syncing. Implemented user data management and authentication using **Supabase**
- Integrated **LemonSqueezy API** to enable seamless payment processing for premium features

UbaySystem - *ubaysystem.uz*

Sep 2023 – Feb 2024

Backend Engineer Part-time

Tashkent, Uzbekistan

- Led the design and implementation of a secure, **NestJS microservice-based** authorization server with integrated local and third-party **SMS API** for password-free login in an intercity taxi application.
- Designed a data model for the entire authorization server, employing Prisma and PostgreSQL, with a focus on smart and scalable design solutions.
- Automated deployment of the authorization server on **DigitalOcean** using **GitLab Runner**, enhancing efficiency.
- Collaborated with mobile and frontend engineers to establish REST API contracts and document them using Swagger.

WoodlinePro - *woodlinepro.uz*

Nov 2022 – Mar 2024

Backend Engineer Full-time

Tashkent, Uzbekistan

- Led the development of a Grocery and Food Management System catering to over 200 users, enabling streamlined ordering and purchase processes for products and lunch meals. Utilized **TypeScript** to develop robust and scalable backend functionalities.
- Devised a **dynamic permission system**, segmenting operations into individual permissions to enhance user access control.
- Played a key role in developing a **NestJS microservices-based ERP system** for a furniture manufacturing company, focusing on pricing management, warehouse management services, and creating npm packages. Contributed to data modeling using **Prisma and PostgreSQL**.
- Mentored and assisted with the onboarding of **2 new hires**.

MacBro - *macbro.uz*

Sep 2022 – Nov 2022

Backend Engineer Intern

Tashkent, Uzbekistan

- Acquired proficiency in **Git/GitHub**, including workflow management and clean architecture principles. Gained exposure to data modeling processes, learning how to structure and manage data effectively.
- Engaged in daily development discussions, collaborating with the team, including the Lead Backend Engineer and Frontend Expert, as well as fellow interns.

Projects

ShowroomLeads | *Nodejs, Typescript, Mongodb, socket.io*

- Built a server to enhance showroom operations, enabling sellers to efficiently record customer visit details and contact information for targeted call center follow-ups.
- Implemented real-time data submission in the server using **Socket.io** for instant updates and communication.

Skills

Languages: English - Intermediate, Uzbek - native
